

(For students admitted in 2020-21 under the 4-year degree)

## School of Science

In addition to the requirements of their major programs, students are required to complete the School Requirements as shown below.

Some courses used to fulfill both Major and/or School Requirements can also fulfill University Common Core Requirements. Students may reuse a maximum of 9 credits of these courses to count towards both Requirements.

Some foundation courses listed below are also requirements of SSCI majors. These courses may also be used to fulfill Major Requirements, in addition to School Requirements. Students may consult the School for details and academic advice.

Students may use no more than 6 credits earned from courses offered in self-paced online delivery mode to satisfy the graduation requirements of a degree program. This 6-credit limit does not apply to credits obtained through the credit transfer procedures of the University.

Courses counted towards the School Requirements under the School of Science are generally not included in the calculation of the major cumulative grade average (MCGA). However, those which are also used to fulfill the Major Requirements including the Major Prerequisites will be counted towards the MCGA.

Some courses in the curriculum have been previously coded with CORE-prefix where the special CORE-prefix has been replaced by the domain code of courses starting from Fall 2023-24. Students who have registered with these CORE-coded courses may look up their latest course codes by consulting the conversion table published on the Common Core website.
