

(For students admitted in 2023-24 under the 4-year degree)

BSc in Computer Science

This program of study is designed for students who wish to pursue their study in computer science but wish to graduate with additional major(s). Students enrolling in the program as their first major are expected to simultaneously declare study in an additional major. Alternatively, students who are already enrolled in a different first major may declare this program as an additional major.

To enroll in this program (whether as first major or additional major), students are expected to have a CGA of 3.7 or above and have a feasible study plan to complete all the requirements for the degree and additional major(s) concerned within the normal duration of study. Applicants with lower qualifications are also encouraged to apply and will be considered on an individual basis.

In addition to the requirements of their major programs, students are required to complete the University requirements for graduation. For details please refer to the respective section on this website.

Students may use no more than 6 credits earned from courses offered in self-paced online delivery mode to satisfy the graduation requirements of a degree program. This 6-credit limit does not apply to credits obtained through the credit transfer procedures of the University.

For students graduating with an additional major, they must take all the requirements specified for that major, within which they must complete at least 20 single-counted credits. These 20 credits cannot be used to fulfill any other requirements for graduation except for the 120-credit degree requirement.

Under the new 30-credit Common Core Program which is applicable to students admitted to the University in 2022-23 and thereafter, courses that have been counted towards Major Requirements are not allowed to be reused for fulfilment of the University Common Core Requirements. Students should look up the details of the Common Core Program including the general and School-/program-specific distributional requirements posted on the Common Core website where the link to it is available on this website.

COMP

COMP 2000-level or above Electives [Any 6 courses of the subject and level as specified. For students who have taken the 6-credit course COMP 4981 or COMP 4981H to fulfill this elective requirement, the minimum number of courses required to satisfy this requirement may be reduced by one. With approval by the Dean or the Dean's designate, students may use up to 3 computer science related courses (9 credits) offered by non-CSE department(s) to count towards this requirement.]
